

The Path from 25 to 100 Cafes

A plain-English roadmap for Sidy Sow: How we automate sales grunt work, protect your brand, scale recurring cafe orders, and get you back to being your own boss full-time.

1. THE TARGET

100 Partner Cafes

€15,000–€30,000/month recurring income so Sidy quits his Swiss job permanently.

2. THE ENGINE

24/7 Digital Copilot

Scrapes cafe leads, drafts WhatsApp pitches, and parses crumpled order notes automatically.

3. THE CONTROL

3 Governed Tiers

Sidy retains 100% authority via WhatsApp 1–tap approval. Zero brand risk.

THE B2B CONVERSION WEAPON

€19 Borosilicate Teapot Starter Kit

The physical Trojan Horse that turns cold Berlin cafes into lifelong wholesale accounts (100% credited on first crate).

Why Are We Doing This? Sidy's Reality vs. The Goal

Sidy imports and blends world-class organic tea, matcha, and chai. The tea is loved by customers, but current operations demand too much manual time for too little predictable cashflow.

CURRENT REALITY // THE FOUNDER'S TRAP

Why Sidy Is Stuck Working a Day Job

- **High Swiss Living Costs:** Sidy moved to Switzerland where expenses are high; the tea business doesn't yet yield steady monthly cashflow.
- **Tired & Working for Others:** Trapped in an exhausting job at a Norwegian firm: *"It's been a long walk... I'm tired. I want to become again my own boss."*
- **25 Happy Accounts:** He already has ~25 great cafes buying regularly, but customer acquisition is stalled due to lack of time.
- **Manual Friction:** Sidy spends his evenings manually messaging cafes on Instagram and deciphering paper orders.

THE TARGET // THE 100-CAFE EQUATION

What 100 Accounts Actually Unlocks

100 CAFES @ €200-€350 / MONTH AVG ORDER

- **€15,000 to €30,000 / Month:** Predictable recurring wholesale tea orders month after month.
- **90%+ Gross Margin:** Premium tea carries extraordinary margins when ordered in bulk and delivered directly.
- **Full-Time Freedom:** Sidy hands in his notice in Switzerland, returns to Berlin as his own boss, and controls his destiny.
- **Zero Additional Headcount:** Reaching 100 cafes without hiring expensive administrative staff.

THE CORE METRIC: Every system and architecture tier Cyril designs serves ONE metric — Getting Sidy back to Berlin as his own full-time boss.

The 5 Bottlenecks Holding Alandas Back Today

Before building any software, we diagnose the exact friction points stopping Alandas from growing from 25 to 100 cafes.

BOTTLENECK 01

Manual Scraping Sucks Time

Searching Google Maps, digging for website owners, and tracking down phone numbers burns **20+ hours a week** of high-effort founder time.

BOTTLENECK 02

Cafes Ignore Cold Emails

Baristas and cafe owners are on their feet serving coffee all morning. They don't check promotional emails—they run their entire business on **WhatsApp**.

BOTTLENECK 03

Order Processing Is Messy

Cafes text Sidy photos of crumpled paper notes: *"Send 2kg Earl Grey, 1kg Chai."* Typing these into invoices by hand creates errors and eats evening hours.

BOTTLENECK 04

Silent Cafe Churn

A cafe runs out of tea on Day 28. If Sidy doesn't text them on Day 25, they panic-buy generic supermarket tea in an emergency, and Alandas quietly loses the account.

BOTTLENECK 05 // THE TRAUMA

Burned by Fragile AI (Hermes)

Sidy previously set up an AI bot called "Hermes". It crashed, lost its memory, wiped prompts and order data. **He rightly refuses fragile low-code tools that break.**

THE OPPORTUNITY

The Automated Remedy

Replace manual hustle and fragile bots with a **durable, crash-resilient revenue machine** backed by solid engineering standards.

What We Are Building: Your 24/7 Digital Revenue Machine

Think of it like hiring an unpaid, tireless digital sales and operations team that handles the tedious grunt work while Sidy retains total authority.

THE 6-STAGE REVENUE PIPELINE

- 01 // DISCOVER: Specialty Cafe Ingestion**

Scans Google Maps & Instagram for >30-seat brunch cafes in Berlin & Munich.
- 02 // ENRICH: Legal Impressum § 5 TMG Waterfall**

Extracts verified owner WhatsApp numbers via German public registries for €0.00.
- 03 // OFFER: Trojan Horse €19 Trial Starter Kit**

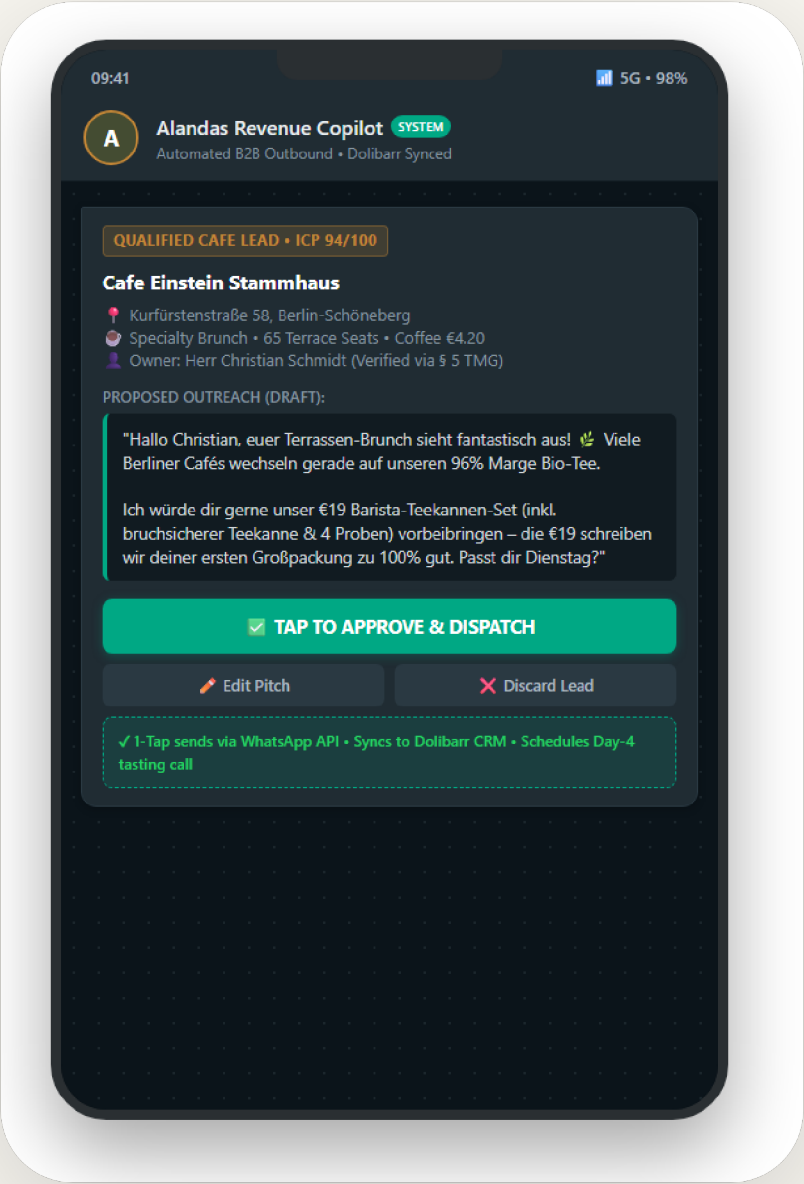

Pitches the borosilicate teapot kit (100% credited back on first wholesale crate).
- 04 // 1-TAP APPROVAL: Sidy Retains 100% Authority**

AI drafts warm personalized message; Sidy reviews on his phone & taps 'Approve'.
- 05 // INVOICE OCR: Automated Dolibarr CRM Sync**

AI deciphers handwritten barista notes into draft German tax-compliant invoices.
- 06 // RETENTION: Automated Day-25 Refill Alerts**

Automated WhatsApp reminder before cafes run out of tea, ending silent churn.

WHAT SIDY SEES ON HIS IPHONE // 1-TAP APPROVAL

Why 3 Tiers? "Don't Build a Spaceship on Day 1"

The biggest mistake in AI automation is trying to make a machine fully autonomous on Day 1. That leads to hallucinations, blown budgets, and broken trust. We earn complexity tier by tier.

TIER 3	Autonomous Revenue Platform (100+ Cafes) The closed-loop commercial machine. Live cafe replenishment rates automatically trigger and optimize Meta Ad campaigns.	EARNED AT SCALE
TIER 2	Governed Intelligence (40–70 Cafes) The smart assistant with financial guardrails. Policy engines verify ad budgets, wholesale discounts, and prices before execution.	EARNED AFTER PROVING TIER 1
TIER 1	Essential Automation (25–40 Cafes) — START HERE The tireless grunt worker. Machine handles prospecting, enrichment, and invoice drafting; Sidy retains 100% approval authority.	START TODAY (ZERO RISK)

The Governing Rule: You do not pay for complexity until business volume justifies it. Each tier builds cleanly on top of the last without throwing away a single line of code.

[Open Canvas Viewer](#)

Tier 1: "The Tireless Assistant" (Sidy is Pilot)

Sidy is in 100% control. The machine gathers facts and proposes actions; Sidy taps Approve before anything happens.

HOW THE 5 STEPS WORK // 100% HUMAN-IN-THE-LOOP

Read → Analyze → Propose → Approve → Execute

Sidy is in full control. The bot gathers facts, but Sidy taps Approve before anything happens.

1. Read: Public Cafe Ingestion

Scans Google Maps & Instagram for cafes with >30 seats in Berlin & Munich.
2. Analyze: ICP Concept Fit

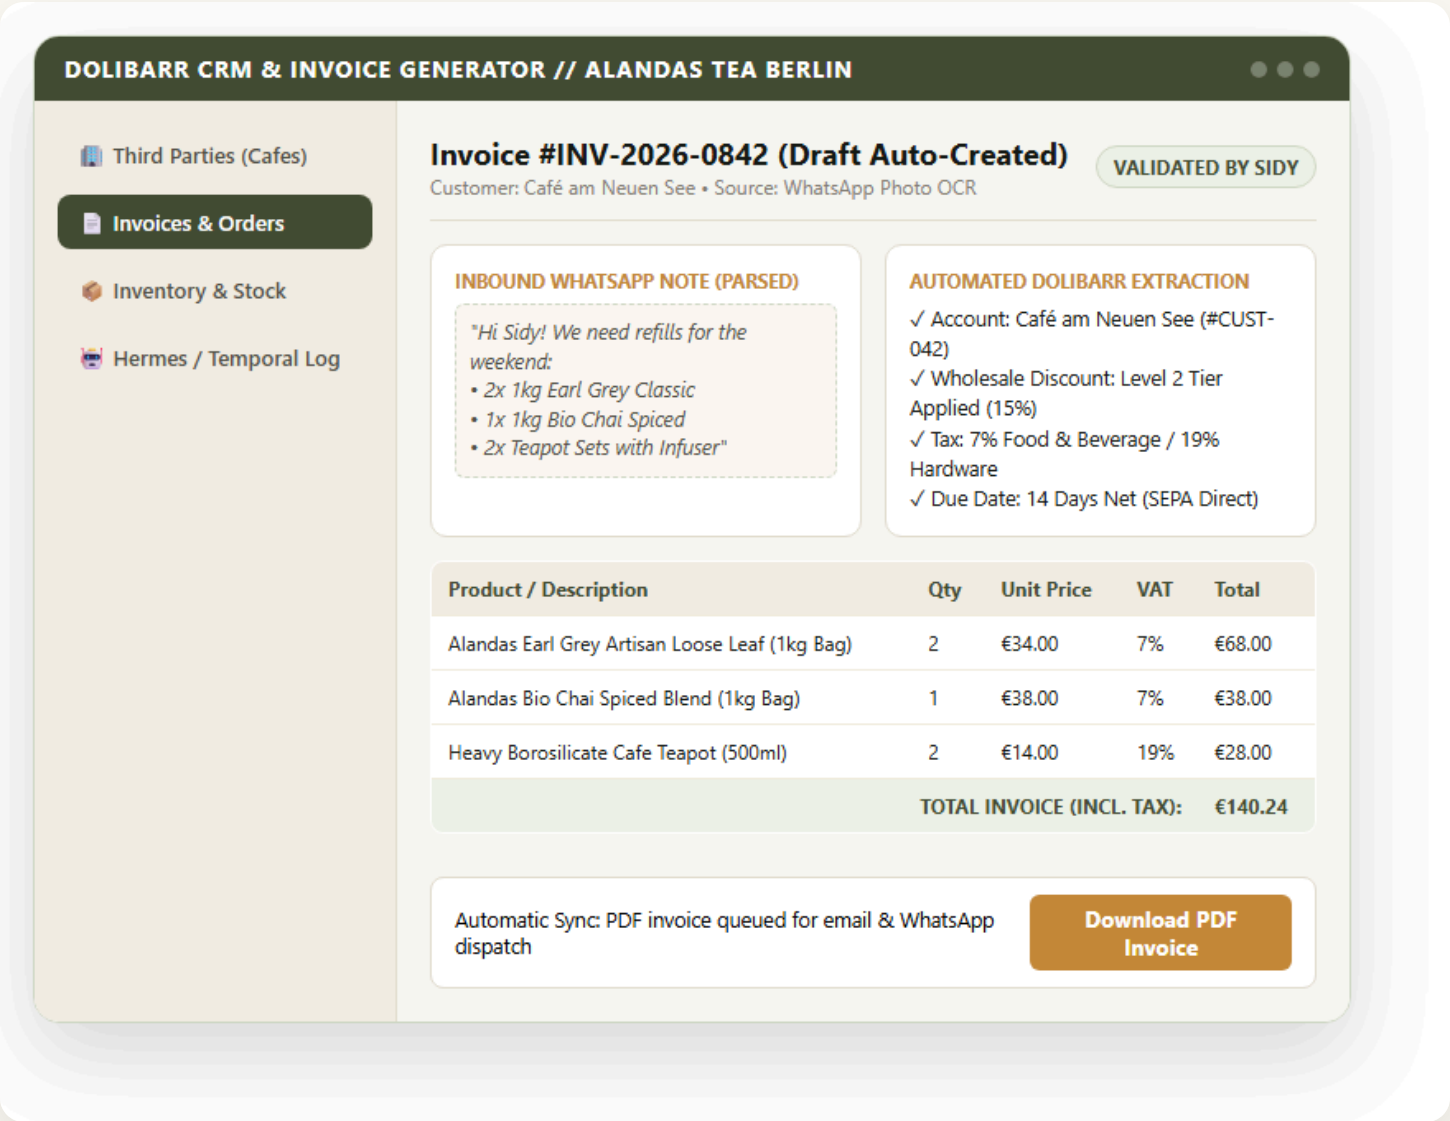

Evaluates beverage menu, terrace seating, specialty coffee focus, and owner names.
3. Propose: Warm Personalized Pitch

AI drafts warm WhatsApp message offering the €19 teapot kit with 100% crate credit.
4. Human Approves: Sidy's Safety Gate

Draft lands on Sidy's phone. Sidy taps **Approve**. The bot never sends unreviewed messages.
5. Execute: Temporal & Dolibarr Sync

Dispatches WhatsApp via API, creates Dolibarr CRM lead, and sets Day-4 follow-up.
- Commercial Impact: Zero brand risk • Saves 15+ hrs/week • Target: 25 → 40 Cafes (~€5,000/mo).

WHAT DOLIBARR CRM LOOKS LIKE // NOTE → INVOICE

Tier 2: "The Smart Assistant with Guardrails"

As volume grows, the machine suggests smart business moves, but unbreakable safety rules prevent it from ever burning cash or making mistakes.

THE REAL-WORLD EXAMPLE // FINANCIAL GUARDRAILS

Increasing Meta Ad Budget by +30%

How unbreakable Policy Engines protect Sidy's bank account and brand integrity:

1. AI Observes Campaign Telemetry

Berlin brunch ad achieves 4.2x ROAS. System proposes raising daily budget from €30 → €39/day (+€9).
2. Hard Policy Ceiling Check

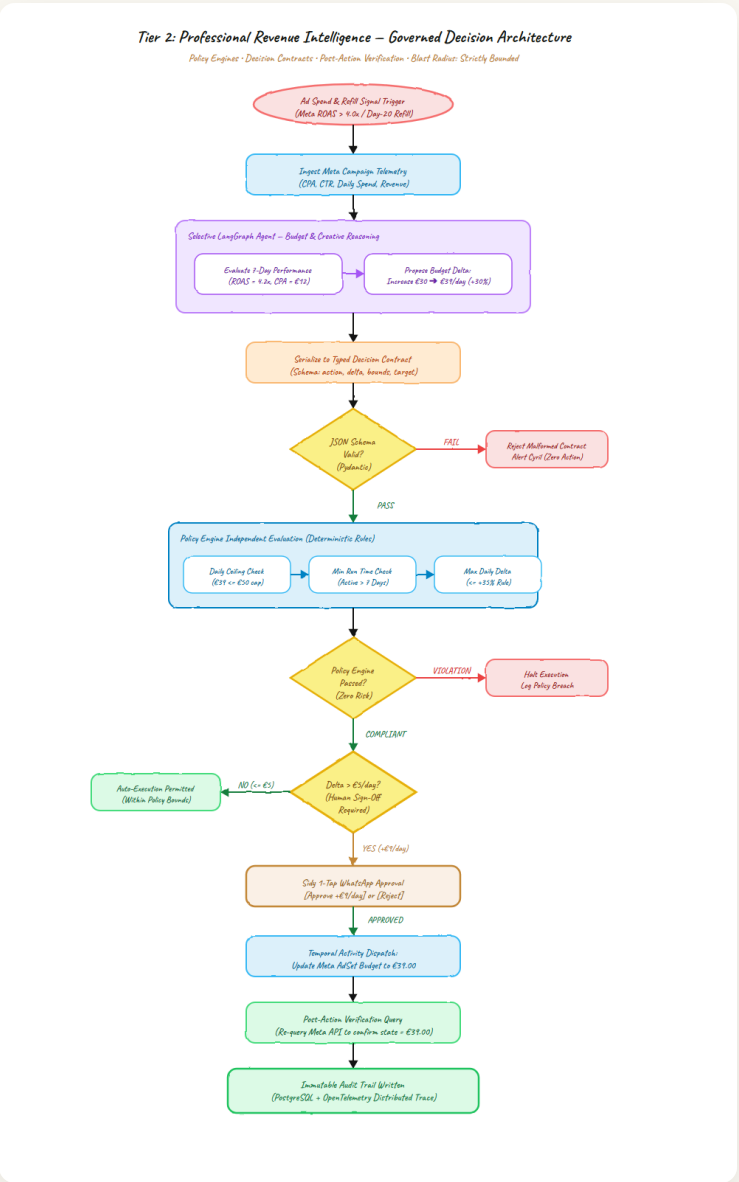

Policy Engine checks safety rules: Is €39 under our maximum €50/day hard cap? (PASSED).
3. Human Sign-Off Threshold Check

Rule triggers: Any budget increase >€5 strictly requires human sign-off. (TRIGGERED).
4. Sidy Receives 1-Tap WhatsApp Ping

Sidy's phone dings: "Approve +€9/day for Berlin Brunch ad?" Sidy taps Approve.
5. Post-Action State Verification

AI updates Meta API, then immediately re-queries Meta to confirm state is €39.00 and NOT €390.00.
- Commercial Value: Zero runaway spend • Zero pricing leaks • Target: 40 → 70 Cafes (~€12,000/mo).

GOVERNED DECISION CONTRACT GATE

Tier 3: "The Self-Running Business Machine"

At 100+ accounts, Alandas operates like a multi-million-euro beverage brand with zero extra office staff. Sales data trains marketing automatically.

THE CLOSED-LOOP FLYWHEEL // CROSS-CITY OPERATIONS

Munich Terrace Summer Scenario

How sales, inventory, and marketing coordinate automatically without human friction:

- 1. Reorder Velocity Spike Trigger**

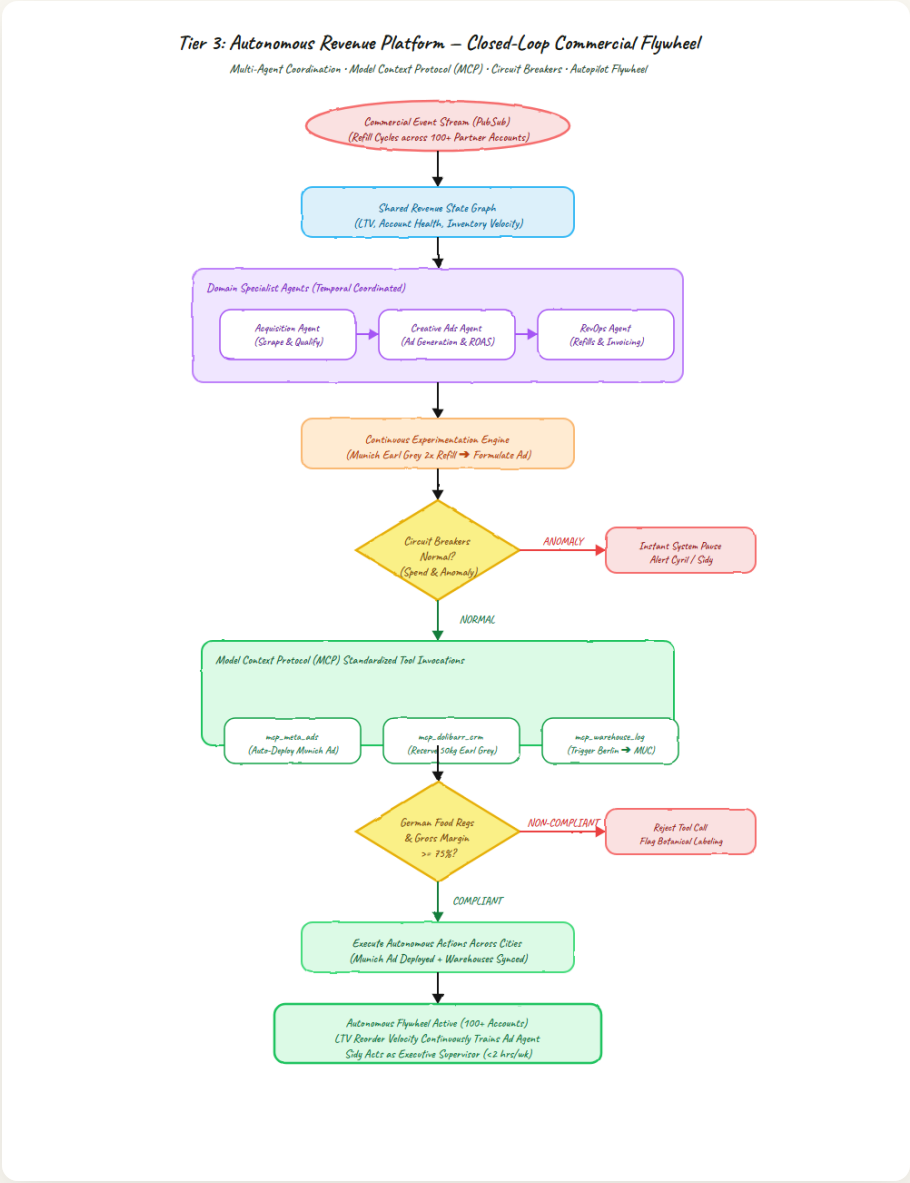

In July, Munich cafes reorder Earl Grey and Berry Hibiscus 2x faster for outdoor iced tea.
- 2. Ops Signals Marketing Agent**

The system flags that terrace iced tea demand is surging in Munich and triggers ad creative generation.
- 3. Targeted Creative Deployment**

Marketing Agent writes ad copy: *"Serving iced tea on your Munich terrace? Try our €19 barista kit."*
- 4. Autonomous Scaling & Warehouse Sync**

Launches tests, validates high conversion, allocates ad budget, and reserves warehouse stock automatically.
- Founder Independence: Zero linear headcount • Automatic circuit breakers • Sidy is full-time CEO (100+ Cafes, €20k–€30k/mo).**

AUTONOMOUS COMMERCIAL FLYWHEEL

The 3 Technical "Secret Weapons" (In Plain English)

When explaining the tech to Sidy or investors, use these three simple metaphors instead of confusing acronyms.

SECRET WEAPON 01

Temporal vs. n8n

"Carving in Stone vs. Sticky Notes"

n8n writes orders on sticky notes. When the server crashes, notes blow away and data is lost (why Hermes died).

Temporal carves every step into solid rock. If the power dies or an API crashes for 3 hours, it resumes at the exact line of code when restored. Zero lost orders.

SECRET WEAPON 02

German Impressum Waterfall

"Cheapest Tool First (87% Savings)"

Normal agencies waste €80 looking up 1,000 leads.

In Germany, § 5 TMG requires all business sites to publish owner names & emails for free. Our custom scraper grabs **48% of leads for €0.00**. We only use paid tools for the few missed leads. Total cost: €10 instead of €80.

SECRET WEAPON 03

The Policy Engine Bouncer

"The Guardrail at the Bank Vault"

No AI is ever handed Sidy's credit card or pricing authority.

The AI must write a typed proposal (Decision Contract). The bouncer (Policy Engine) checks: *Is discount allowed? Is budget safe?* If unusual, it rings Sidy's phone for 1-tap confirmation.

CORE ARCHITECTURAL DEFENSE: Zero low-code toys. Zero lost data via Temporal state durability. Zero runaway spend via deterministic Policy Engines.

Choose Your Tier: Modular Revenue Architecture

Sidy gets to choose which tier fits his current stage and comfort. Every tier is modular—you never discard code or rebuild from scratch.

OPTION 01 // RECOMMENDED START

Tier 1: Essential

The Tireless Assistant (Sidy is Pilot)

- **What It Solves:** Stops 20+ hours of manual Google Maps scraping & Instagram messaging.
- **Core Engine:** Legal Impressum § 5 TMG scraper, AI draft generator, Dolibarr CRM invoice OCR.
- **Human Control:** Sidy approves every outbound message and invoice on WhatsApp.
- **Sidy's Routine:** Spends just **30 mins/day** on WhatsApp reviews.

TARGET SCALE & CASHFLOW

25 → 40 Partner Cafes
~€5,000 / month recurring cashflow

OPTION 02 // GROWTH & PROTECTION

Tier 2: Governed

Smart Assistant with Guardrails

- **What It Solves:** Eliminates silent cafe churn and prevents runaway ad spend.
- **Core Engine:** Policy Engine (+30% ad budget rules, hard caps), Day-25 predictive refill alerts.
- **Human Control:** Any budget change >€5 requires Sidy's 1-tap WhatsApp sign-off.
- **Sidy's Routine:** Admin drops to **< 4 hours/week**. Sidy prepares his notice.

TARGET SCALE & CASHFLOW

40 → 70 Partner Cafes
~€12,000 / month recurring cashflow

OPTION 03 // ENTERPRISE SCALE

Tier 3: Autonomous

Self-Running Multi-City Flywheel

- **What It Solves:** Scales across Germany, Austria & Switzerland without hiring sales reps.
- **Core Engine:** Closed-loop flywheel connecting cafe reorders to Meta ad creative; warehouse sync.
- **Human Control:** Automatic circuit breakers halt anomalies; Sidy acts as Chairman.
- **Sidy's Routine:** 100% full-time independent founder & CEO (< 2 hrs/week oversight).

TARGET SCALE & CASHFLOW

100+ Partner Cafes
€20,000–€30,000 / month recurring

THE FREEDOM PRINCIPLE: Sidy chooses where to begin. No time lock-in. Tier 1 gives immediate relief on Day 1; higher tiers unlock whenever Sidy wants to scale.

100% MODULAR ARCHITECTURE

Starting Sprint 1 Today: The First 4 Concrete Steps

We don't need months of preparation. We can initiate the Tier 1 foundation immediately with 4 clear deliverables.

STEP 01

Stabilize Dolibarr CRM

- Set up automated daily cloud database backups.
- Clean existing 25 cafe customer records.
- Ensure order history and invoices are never lost.

STEP 02

Standardize €19 Trial Kit

- Box the borosilicate glass teapot with micro-infuser.
- Include 4 signature organic tins (Earl Grey, Chai, etc.).
- Insert 100% wholesale crate credit voucher.

STEP 03

Run \$ 5 TMG Scraper

- Extract 200 brunch cafes in Berlin & Munich for €0.00.
- Resolve verified owner names & mobile numbers.
- Zero wasted ad spend or expensive data broker fees.

STEP 04

1-Tap WhatsApp Pilot

- Generate first 10 personalized trial kit drafts.
- Send to Sidy's WhatsApp for instant review.
- Sidy taps Approve with one click to initiate pilot.

SPRINT 1 TANGIBLE DELIVERABLE

€19 Trial Kit Ready to Dispatch

Ready to box and send to the first 10 Berlin cafes this week.
